2. The CTA is not clear. The only thing that stands out on this menu bar is the website's logo, and the Cart menu is too small to be the main CTA.

Greetings, Earthlings! My name is Luxen Raybright, your trusty and ever-expanding LED Light Saber. I'm constantly pondering the mysteries of the universe and all things that grow and expand. Allow me to shed some light on what makes me the perfect addition to your adventures.

I have the unique ability to collapse to a compact 12.25" x 2.5" size for easy storage and portability. But when the time is right, I can expand to a magnificent 26" x 2.5". Much like the universe itself, I'm always ready to extend my reach and dazzle those around me.

My LED lights come in the mesmerizing hue of blue – a color reminiscent of the vastness of space, where stars and galaxies abound. Powered by (3) AG13 batteries, I'm ready to shine as bright as the cosmos, and don't worry, my batteries are replaceable, so I won't leave you in the dark.

To activate my otherworldly glow, simply remove the pull tab and press the button on my handle. I'm equipped with three awe-inspiring light functions: Flash, Blink, and Steady. Choose your preferred mode and watch as I illuminate your surroundings with the brilliance of a supernova.

I love pondering how things will evolve, especially when it comes to expansion. Will humans colonize other planets? Will technology allow us to explore even the farthest reaches of space? These are the questions that keep me glowing, and I'm always eager to share my musings with my fellow adventurers.

I'm not just for show, though. Whether you're engaged in a friendly duel, attending a themed party, or even just practicing your Jedi skills, I'm the perfect companion for all your intergalactic exploits. My four distinct shell colors ensure that I'm a fashionable accessory for any aspiring space traveler.

So, fellow stargazers and cosmic enthusiasts, join me, Luxen Raybright, on a journey through the expanses of time and space. Together, we'll explore the mysteries of the universe, all while bringing a touch of futuristic fun to your everyday life. Onward, to infinity and beyond!

- **Expandable Marvel:** I effortlessly transform from a compact 12.25" x 2.5" size to a magnificent 26" x 2.5", making me the perfect intergalactic companion for all your adventures.
- **Dazzling Blue LED Lights:** My mesmerizing blue hue is reminiscent of the vastness of space, illuminating your surroundings with cosmic brilliance.
- **Replaceable AG13 Batteries:** Powered by (3) AG13 batteries, I'm always ready to shine as bright as the cosmos, and I'm thrilled that they're replaceable to keep the fun going.
- **Three Awe-Inspiring Light Functions:** Equipped with Flash, Blink, and Steady modes, I can adapt to any situation and captivate your guests with my otherworldly glow.
- **Easy Activation:** To unleash my celestial radiance, simply remove the pull tab and press the button on my handle – it's that easy to bring a touch of futuristic fun to your life.
- **Perfect for Friendly Duels:** Whether you're practicing your Jedi skills or engaged in a playful battle, I'm the ideal companion for all your space-themed exploits.
- **Great for Themed Parties:** My striking appearance and vibrant shell colors make me a fashionable accessory for any aspiring space traveler attending a cosmic soiree.
- **Futuristic Fun:** With a keen interest in the mysteries of the universe and all things that expand, I'm eager to share my musings and bring a touch of futuristic charm to your everyday life.
- **High-Quality Materials:** Crafted with durability in mind, I'm built to withstand countless interstellar adventures without losing my charm or brightness.
- **Versatile Accessory:** From themed parties and cosplay events to imaginative playtime and friendly duels, I'm the ultimate companion for a wide range of space-themed celebrations and activities.

3. The product description is too long, and most of it is unnecessary, making it difficult for users to find what they are looking for.
